Projects

Academic Advising System for CS department - University of Puerto Rico, Arecibo (08/2020 - 12/2020)
- Web application that will automate counseling for students from the Computer Science department.
- Created script that reads student's record, identifies each course type and uploads to database.
- Designed the student's dashboard and created the "set up appointment" feature.
- Developed a search bar for looking up students in the counselor's panel.
- Implemented in **HTML, CSS, Bootstrap, JavaScript, AJAX, PHP and MySQL.**

Floune (07/2020 - 08/2020)
- E-commerce implemented in **React, Redux, axios, Firebase and Sockets.io.**
- Perform user operations like search products, place items in cart, register account.
- Admin panel to add, edit and remove products, users and chats.
- Real-time help chat to answer user questions.

Extracurricular Activities

Vice-President of Computer Science Students Association (August 2018 – May 2019)
- Collaborated with companies to give orientations on campus.
- Assisted professors to give seminars on topics such as interview prepping, MatLab, linux etc.

Virtual Hackathon "Sembrando Sentido" (November 2020)
- Developed "search categories" feature and account homepage.
- Awarded 2nd place due to great design, functionality and technologies chosen.
